Hi [REDACTED],

[https://indstate.curriculog.com/proposal/\[REDACTED\]/form](https://indstate.curriculog.com/proposal/[REDACTED]/form)

I have a question about the calculation of the total credits for the two specializations included in this proposal. For economics specializations, I counted 74-85 credits in major by adding up the following categories:

Economics (15 credits)

+

another teaching area (15-24 credits)

+

Courses Required for Disciplines not Chosen as Teaching Areas (9-12 credits)

+

Required Professional Education (4 credits)

+

Professional Education Courses Taught in the Bayh College of Education (31 credits)

For Geography specialization, I counted a total of 75-87 credits by adding up the following:

Geography (16 credits)

+

another teaching area (15-24 credits)

+

Courses Required for Disciplines not Chosen as Teaching Areas (9-12 credits)

+

Required Professional Education (4 credits)

+

Professional Education Courses Taught in the Bayh College of Education

(31 credits)

The proposal has 74-77 credits for both specializations. I guess my calculation is off somewhere. Will you please help to clarify this for me?

Thanks,

Haijing Tu, Ph.D.
